(NAME OR NAMES OF CLAIM)

(LODE OR PLACER)

TO WHOM IT MAY CONCERN: Please take notice that Martel Mining Company  
(NAME OF OWNER OR CLAIMANT)  
 says that he-they expended more than \$14,700.00 dollars for labor and improvements, as the annual  
 assessment work for the year ending September 1, 1968, on the below listed  
 mining claim s, in the Cortez  
 Mining District, Eureka County, Nevada, owned by Martel Mining Company  
 for the purpose of holding said claim s.

Said labor was performed by Daniel Pekarovich, E.L.Doheny, E.F.Lawrence, and  
E.L. Stephenson  
(NAME OF PERSON OR CONTRACTOR WHO PERFORMED THE WORK)

on XXXXXX Month XXXXXX Day XXXXXX Year XXXXXX A.M. XXXXXX P.M. (Continue on back if necessary)

This work was performed during the course of the year beginning November 1,  
 1967 through October 30, 1968.

Such work or improvements, and character, consisted of Rebuilding the 4-Mile Canyon  
access road, deepening the core hole F-7 located on the Falcon 20 claim  
and such other work as described on the attached report, for the benefit  
of the entire contiguous group of claims.

GEOLOGIC REPORT

FOURMILE CANYON AREA, CORTEZ RANGE, EUREKA COUNTY, NEVADA

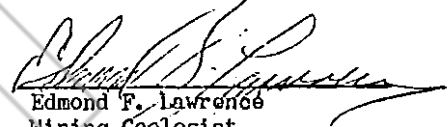

For and with respect to the assessment year September 1, 1967 to September 1, 1968, geological and geochemical surveys were conducted as directed by Robert L. Redmond, Manager for Martel Mining Company, upon the Falcon, Pat, Ina, and End Group of contiguous mining claims located in Fourmile Canyon, Cortez Range, Eureka County, Nevada. Such work was done at the instance and expense of the Martel Mining Company as directed by Robert L. Redmond.

Such work and surveys consisted of delineating geologic structures in more details, logging drill cores from FM-7 and FM-9 drill holes, geochemical sampling of drill cores, and geochemical surveys for gold on part of the Falcon and Pat mining claims as shown on the geochemical map accompanying the detailed report dated January 31, 1968.

The basic findings from such surveys were: (1) certain areas in Fourmile appear to be anomalous for gold, (2) these anomalous areas appear to coincide with arsenic anomalies, (3) small amounts of gold was found in drill holes Nos. 7 and 9 associated with arsenopyrite, and (4) these anomalies appear to be spatially and genetically(?) associated with quartz-porphyry intrusives.

Such work was performed by Edmond F. Lawrence, Mining Geologist, assisted by E.L. Stephenson, Consulting Mining Geologist, Robert L. Redmond, Geologist, John H. Volgamore, Geologist, H.J. Lawrence, and Johnie Yarn.

Edmond F. Lawrence is a mining geologist, holding a B.S. degree in geology from the University of Alabama, and a M.S. degree in geology from the University of California at Los Angeles. His experience includes six years as a mining geologist with the Anaconda Company and the Idaho Maryland Mines Company, six years as a mining geologist for the Nevada Bureau of Mines, and seven years as a consulting mining geologist.
