

AFFIDAVIT OF ANNUAL ASSESSMENT WORK
FOR UNPATENTED LODE MINING CLAIMS

STATE OF COLORADO)
) SS:
COUNTY OF MESA)

TO WHOM IT MAY CONCERN: Please take notice that W. L. Wilson, being first duly sworn, says that there was expended more than \$800.00 in labor and improvements, as the annual assessment work for the year September 1, 1970 to September 1, 1971, on the following contiguous unpatented lode mining claims:

SADIE NOS. 1 to 8, inclusive, whose location certificates were recorded in Book 33, Official Records, at Page 254 - 257;

all situate in the Eureka Mining District, Eureka County, Nevada, and owned by David J. Gray and Ellen M. Gray, whose address is P. O. Box 259, Carson City, Nevada 89701. Said work was done for the purpose of holding said claims, and was performed by W. L. Wilson, A. K. Wilson, Jr., and Skyline Labs, Inc. at the instance and expense of Idaho Mining Corporation, the Lessee of said claims. Said work was performed between September 1, 1970 and August 24, 1971.

Such work or improvements consisted of performing further geochemical studies of said claims, which survey was non-repetitive of any previous known work, and benefited each of said claims. A report giving the basic findings of such survey is attached hereto.

Dated this 25th day of August, 1971.

REPORT ON GEOCHEMICAL SURVEY,
SADIE NOS. 1 to 8 CLAIMS

A geochemical survey of the Sadie Nos. 1 to 8, inclusive claims, was conducted, starting on July 2, 1970, and continuing through September 18, 1970, as assessment work for 1969-1970. The survey being reported currently (1970-1971) extended the traverse lines of the previous soil sample survey, to delimit the anomalies found, and interspersed traverses between the previous traverse lines where needed, to further define the anomalous zones. In addition, rock chip samples were taken from the claims, and were analyzed for gold, silver, mercury and arsenic. The work was done by W. L. Wilson, A. K. Wilson, Jr., and Skyline Labs, Inc.

The basic findings from such studies were:

1. The mercury anomaly on the Sadie Nos. 5, 6 and 7 claims was further defined.
2. The heavy metals anomaly on the Sadie Nos. 6 and 7 claims was delineated.
3. The rock chip samples showed very high values for mercury and arsenic within the anomalous area reported in 1 above, and significant amounts of gold.

This survey was non-repetitive of any previous known work, and did further the exploration and development of each claim in said group.

The writer, W. L. Wilson, who supervised the above survey, has been Exploration Manager for Idaho Mining Corporation for 12 years, and previous to that was employed in the mining and mineral exploration business for 6 years.

Dated August 25, 1971.

W. L. Wilson
