

AFFIDAVIT OF ANNUAL ASSESSMENT WORK  
FOR UNPATENTED MINING CLAIMS

STATE OF COLORADO )  
                          ) ss.  
COUNTY OF MESA )

TO WHOM IT MAY CONCERN:

Please take notice that W. L. Wilson, being first duly sworn, says that in excess of \$2,100.00, being more than \$100.00 per unpatented mining claim (identified below), was expended for labor and improvements on or with respect to such claims, consisting of a geological survey of the claims, consisting of a correlation and compilation of previous geological and geochemical work, additional geologic mapping, and geochemical sampling, all directed at a geological-geochemical survey of the claims to formulate a drilling program for future work. This work was non-repetitive of previous work done on the claims. Attached as Exhibit "A" is a report of the basic findings of Mr. Carithers' work.

All of the claims listed below are contiguous and adjacent and form a unified block of claims, all of which are owned by John V. Damele, Leo J. Damele, Leo G. Damele, and LeRoy W. Etchegaray, all of Eureka, Nevada, and under lease/option to Idaho Mining Corporation, in whose behalf the above expenditures were made. Such work improved and benefitted the entire block of claims and each of the individual claims forming such block.

The names of the unpatented claims in such block, for the benefit of which such labor and improvements were performed or made, together with the Book and Page of the recording of the Certificates of Location thereof in the Office of the Recorder of Eureka County, Nevada are, respectively, as follows:

all situate in the Tonkin Mining District, Eureka County, Nevada.

The above expenditures were made between September 1, 1972 and August 28, 1973 for the assessment year which commenced September 1, 1972 and ends September 1, 1973. The work and improvements were made by Ward Carithers, Consulting Geologist of Reno, Nevada, Skyline Labs, Inc. of Wheatridge, Colorado, Rocky Mountain Geochemical Corporation of Sparks, Nevada, and personnel of Idaho Mining Corporation.

Dated this 28th day of August, 1973.

EXHIBIT "A"

STATEMENT OF GEOLOGIC INVESTIGATIONS FOR THE BENEFIT OF THE DOE, REY, ME, TONKIN AND IMPERIAL GROUP OF 21 LOPE MINING CLAIMS, TONKIN DISTRICT, EUREKA COUNTY, NEVADA:

With respect to the Annual Labor performed on and for the benefit of the subject mining claims during the Assessment year ending September 1, 1973, this is to certify that the writer, Ward Carithers, conducted a geological investigation of the said mining property during the month of August, 1973. Said investigative work was done at the instance of and expense of Idaho Mining Corporation as directed by W. L. Wilson, President.

The basic findings of the investigation are:

- (1) The rocks of the claim area consist of a sequence of limestone, shale and chert of Paleozoic age overlain unconformably by rhyolitic tuff and dacitic flows of Tertiary age. These rocks are considerably obscured by alluvium.
- (2) The Paleozoic and Tertiary rocks are displaced by a fault-breccia zone that trends northward through the claim area. Mineralization by minor amounts of barite, calcite, pyrite, antimony, mercury, silver and gold is associated with the fault zone.
