Assessment work for 1980 consisted of earth disturbing work that would be noticeable to persons in the area consisting of not less than three rotary drill holes located on favorable geology defined during 1978 and 1979. Access roads were built specifically for drilling. Drill holes were located to define ore reserves and to obtain bulk samples for further analysis. The drill sites are located with reference to mining claims as follows:

| <u>DRILL HOLE</u> | <u>LOCATION ON CLAIM</u> | <u>CLAIM NAME</u> |
|-------------------|--------------------------|-------------------|
| M 49              | N end                    | MC 71             |

The aforementioned earth disturbing work performed during the assessment year ended September 1, 1980, served to benefit each of the twenty-seven contiguous unpatented lode mining claims as listed on Attachment A - Properties attached hereto.
