

# PROOF OF PERFORMANCE AND COMPLETION OF ANNUAL ASSESSMENT WORK

STATE OF NEVADA }  
County of EUREKA } ss.

The undersigned, in whose behalf the following described work was performed or improvements made, certifies that at least \$3700.00 Dollars were expended, and/or the following labor expended or improvements made having a value thereof, consisting of:

(Describe Character and Location of Expenditures or Labor or Improvements)  
Consisting of Geological and Exploration work together with  
Rock Analyst of ore which was done by the U.S. Geological  
Survey as per letter attached together with work done by  
Louis Gibellini of a value of over \$5000.00 all for the  
benefit of the property.  
were performed and made upon See list of attached claims marked  
Exhibit "A", attached hereto by reference and made a part hereof.  
(Insert Name(s) of Claim(s))

situated in the GIBELLINI Mining District of the County of EUREKA  
State of Nevada, during the year ending 12:00 Noon, September 1, 1980.

The work described above was performed on GIBELLINI MINE  
(Insert Dates that Work Performed)  
by U.S. GEOLOGICAL SURVEY AND LOUIS GIBELLINI  
(Insert Names of Persons, Corporation or Contractor who Performed the Work or made the improvements.)  
from August 28, 1979 to August 20, 1980.

Such expenditure was made by or at the expense of LOUIS GIBELLINI  
owner(s) of said claim(s) for the purpose of holding said claim(s).

UNITED STATES  
DEPARTMENT OF THE INTERIOR

GEOLOGICAL SURVEY  
Branch of Western Mineral Resources MS 41  
345 Middlefield Road  
Menlo Park, California 94025

August 5, 1980

Mr. Louis Gibellini  
P.O. Box 27  
Eureka, Nevada 89316

Dear Mr. Gibellini:

My report on the geochemistry of three drillholes from "Ridge 7129" probably won't be available for another month or two, but in response to your request of 4 August on the telephone, I can give you the following information about the time and effort involved in the study.

A total of 103 samples of drill cuttings from your mining claims were analyzed by emission spectroscopic methods for 43 major and trace elements by the U.S. Geological Survey. A computer program was developed and used to display the data graphically. About 20 of the samples also were analyzed mineralogically using X-ray diffraction techniques. My participation in these projects, and in the preparation of the forthcoming Open-File report took an estimated 6-8 man-months.

It is not possible for me to give you an estimate of the total cost of this work, but you may be able to determine the approximate investment by comparing this work with that of private laboratories and consultants.

Thank you again for your permission to release the report. If you have any information on the new "breccia" deposit being evaluated now, I would much appreciate seeing it (if circumstances permit).

Sincerely,

John Karl Bohlke  
Geologist
