

AFFIDAVIT OF PERFORMANCE OF
LABOR ON LODE MINING CLAIMS

GEOCHEMICAL SURVEY REPORT

STATE OF NEVADA
COUNTY OF EUREKA

Before me, the subscribed, personally appeared Terry K. Koehn for NL Industries, Inc./NL Baroid who being duly sworn, says at least FIVE HUNDRED DOLLARS (\$500.00) worth of work or improvements were performed or made upon the following described lode mining claims:

| <u>CLAIM NAME</u> | <u>DATE LOCATED</u> | <u>BOOK</u> | <u>PAGE</u> | <u>BLM SERIAL NUMBER</u> |
|-------------------|---------------------|-------------|-------------|--------------------------|
| BS-1 | June 11, 1980 | 82 | 278 | NMC-158921 |
| BS-2 | June 11, 1980 | 82 | 279 | NMC-158922 |
| BS-3 | June 11, 1980 | 82 | 280 | NMC-158923 |
| BS-4 | June 12, 1980 | 82 | 281 | NMC-158924 |
| BS-5 | June 12, 1980 | 82 | 282 | NMC-158925 |

Map File Number 75249

all being lode mining claims situated in the "unknown" Mining District, County of Eureka, State of Nevada (SW¹/₄, Sec. 23, T23N, R48E) during assessment year ending September 1, 1981 that such expenditure was made by NL Industries, Inc., a New Jersey corporation acting by and through its NL Baroid Division, P.O. Box 1675, Houston, Texas, 77001, owner of said claims for the purpose of holding said claims.

Said work consisted of a geochemical survey permitted by Federal Statutes 30 U.S.C. 28.1; 30 U.S.C. 28.2; and 43 C.F.R. S3851.2 and was performed during the period August 22, 1981 to September 29, 1981.

GEOCHEMICAL SURVEY

The survey consisted of geochemical soil and rock chip sampling along lines of traverse located on each mining claim. Rock chip and soil samples were collected on five (5) traverse lines of varying lengths positioned at a distance of 750 feet from each other. A total of thirty-two (32) soil samples were collected at a constant depth of six (6) inches on 300 foot intervals. Collected samples were analyzed for arsenic, barium, copper, gold, silver, and zinc utilizing accepted analytical techniques.

The locations and lengths of the five survey traverse lines are as follows:

Traverse 1: Starting at the NW corner of the BS-1 lode claim (750 feet north and 300 feet west of the BS-1 location monument) the traverse extends 1200 feet in an eastern direction, bearing east-west.

Traverse 2: Starting at the west side center of the BS-1 lode claim (300 feet west of the BS-1 location monument) the traverse extends 1200 feet in an eastern direction, bearing east-west.

BOOK 98 PAGE 569

- Traverse 3: Starting at the NW corner of the BS-5 lode claim (750 feet north and 300 feet west of the BS-5 location monument) the traverse extends 1800 feet in an eastern direction, bearing east-west.
- Traverse 4: Starting at the west side center of the BS-5 lode claim (300 feet west of the BS-5 location monument) the traverse extends 1800 feet in an eastern direction, bearing east-west.
- Traverse 5: Starting at the SW corner of the BS-5 lode claim (750 feet south and 300 feet west of the BS-5 location monument) the traverse extends 1800 feet in an eastern direction bearing east-west.

Results of the sample analysis identify an area with moderately high values for the elements analyzed. These anomalous areas correlate with the existing mineralized structure and indicate that an apparent correlation exists between background values for some of the elements analyzed and rock types occurring in the sampled area. Further interpretation and examination will be required to explain other determined anomalous areas.

The survey was performed by qualified personnel employed by NL Industries, Inc./NL Baroid, P.O. Box 2150, Elko, Nevada 89801, and all geochemical analyses were performed by Skyline Labs, Inc., 12090 West 50th Place, Wheatridge, Colorado, 80033 on behalf of NL Industries, Inc. All exploration and improvements were made for the purpose of actively developing and holding said claims.

The geochemical survey team employed by NL Industries, Inc. consisted of two geochemical samplers/geologists and was directed by a staff geologist. An expenditure of over FIVE HUNDRED DOLLARS (\$682.84) was paid by NL Industries, Inc. to Skyline Labs, Inc. for the geochemical analysis. A report of the survey is on file with NL Industries, Inc./NL Baroid.

Names, Addresses, and Professional Backgrounds:

Terry K. Koehn - Staff Geologist, NL Industries, Inc./NL Baroid.
Bachelor of Science - Geology, University of Wisconsin, 1978.
Experience (3 years) in Western United States Geochemistry.

Star Downs - Geochemical Sampler/Geologist, NL Industries, Inc./NL Baroid. Bachelor of Science - Geology, Fort Lewis College, Colorado, 1979.

Diane Groody - Geochemical Sampler/Geologist, NL Industries, Inc./NL Baroid. Bachelor of Science - Geology, Fort Lewis College, Colorado, 1979.

Gordon H. VanSickle - Geochemist, Vice President and Laboratory Manager, Skyline Labs, Inc.
