Said labor so performed and improvements made upon and for the benefit of the foregoing claims at a cost of not less than One Hundred (\$ 100.00) Dollars per mining claim, includes, but is not limited to, geochemical work.

Said mining claims as more particularly described herein are part of a contiguous group of mining claims owned by All Minerals Corporation, as aforesaid. Said work was for the benefit of all of said claims as a part of a common plan of development and tends to improve and permit the development of each of the above named claims for which this Proof of Labor is being filed.

Said labor and improvements consisted of:

1. Geochemical work

At a direct cost of not less than Eighty Three Hundred Dollars (\$ 8,300.00). In addition to the direct cost above set out the performance of such labor and improvements included supervision, labor costs and expenses of Fifty and 00/100 Dollars (\$ 50.00 ).

Such expenditure was made at the instance and request of All Minerals Corporation, a Nevada Corporation, the owner of the said claims, for the purpose of complying with the laws of the United States (30 U.S.C. § 28) and of the State of Nevada pertaining to annual assessment.

DATED this 11 day of December, 1981.

TITLE: REPORT ON A GEOCHEMICAL SURVEY CONDUCTED ON THE LYNDALL 1  
THRU 91 LODE CLAIMS FOR THE 1980-81 ASSESSMENT PERIOD.

This report is in compliance with the Bureau of Land Management Circular No. 2289, "Regulations Pertaining to Mining Claims Under the General Mining Laws of 1872." (As contained in Title 43 of the Code of Federal Regulations.) Subpart 5 3851.2, Inclusion of Surveys in Assessment Work.

The Lyndall claims numbers 1 thru 91, are located on the western slope of the Roberts Mountains in Sections 15, 16, 17, 21, 22, 27 and 28, in T. 23 N., R 50 E M D B & M in Eureka County, Nevada.

Geochemical surveys were undertaken on the ground for mineral deposits during August 1981. These surveys included the collection and preparation of geologic samples, (predominantly soil samples). (Soil samples were generally collected at a depth of 4 to 6 inches.) These samples were analyzed for precious metals and known indicators. The preparation of these samples for analysis included drying, crushing, grinding, and sifting to minus 80 mesh. Then the samples were analyzed. Samples have been analyzed by All Minerals Corporation Laboratory.

The cost of the work performed on these 83 claims amounted to more than \$8,300.00 dollars. The work covered the entire area on these 83 claims. Also, some of the area adjacent to these claims was included.

The basic findings of the geochemical survey have not been completed at this time. We are in the process of evaluating all of the data, chemical reports, geochemical maps, lab analyses, etc.

The names, addresses and professional background of the persons conducting the work are as follows:

Melvin J. Pack, Senior Geologist, B. S. Geology, University of Utah.  
Robert J. Mackenzie, Geologist, B. S. Geology, Wheaton College,  
Wheaton, Illinois, 1974; M. A. Geophysics, University of Wyoming,  
Laramie, Wyoming, 1977.

Spencer Ball, Chemist, B.S. Chemistry, BYU, Provo, Utah 1977.

Assisted by:

Jerry Schneider, Geology student at Brigham Young University.  
Chris Bailey, Geology student at Brigham Young University.

Addresses of the above are:
