SUMMARY REPORT

This detailed report is filed in compliance with the requirements of Title 30 U.S.C. 28-1 for those claims shown by Exhibit "A".

The work consisted of a soil sampling program and related activities during the period June through July, 1982. The work was done to further evaluate the potential for valuable mineral deposits and assist in further exploration and development work.

The work was performed under the supervision of Gary L. Grauberger, a geologist with twelve years experience in exploration with a degree from the University of Colorado.

An exploration program consisting of further geologic studies and exploratory drilling is under consideration for this property. All technical data resulting from the sampling program and related activities are in the possession of U.S. Minerals Exploration Company.

Mineralized and altered trends were identified by the sampling program which underlie portions of the claim group.
