

PROOF OF PERFORMANCE AND COMPLETION OF ANNUAL ASSESSMENT WORK

STATE OF Nevada }
County of Cerise } ss.

The undersigned, in whose behalf the following described work was performed or improvements made, certifies that at least \$400 Dollars were expended, and/or the following labor expended or improvements made having a value thereof, consisting of:

a non-repitive geochemical survey on the eastern half of RC #1, the western portion of RC #2, and the northern edge of RC #3. A report on the findings of this geochemical survey is attached to this sheet.
(Describe Character and Location of Expenditures or Labor or Improvements)

were performed and made upon and for the benefit of the following contiguous unpatented mining claims : RC #1, RC #2, RC #3, RC #4
(Insert Name(s) of Claim(s))
NMC # 216958 thru 216961

situated in the Sunset Canyon Mining District of the County of Cerise, State of Nevada, during the year ending 12:00 Noon, September 1, 19 82.

The work described above was performed on 6/5/82 thru 8/1/82
(Insert Dates that Work Performed)
by TRV Exploration personnel
(Insert Names of Persons, Corporation or Contractor who Performed the Work or made the Improvements.)

Such expenditure was made by or at the expense of TRV Exploration (Nevada) Inc.
owner(s) of said claim(s) for the purpose of holding said claim(s).

REPORT ON GEOCHEMICAL SURVEY
RC #1, RC #2, and RC #3

A geochemical survey of the above listed unpatented lode mining claim was conducted, starting in June 1982 and ending in August 1982.

The work consisted of a rock chip sampling program along a 1000 foot base line. Samples were taken on 150 foot spacings along an east-west traverse with rows 300 feet apart. Additional rock chip samples were taken across a 100 square foot grid at 50 foot intervals in the distinct anomalous areas determined by the initial survey. All samples were sent to Hunter Laboratory in Reno, Nevada to be pulverized and assayed for gold and silver (by fire assay) and lead and zinc (by atomic absorption).

The basic findings of this survey were:

1. Gold - anomalous values were found near the north central portion of the RC #1 claim, the northwest portion of the RC #2 claim, and the central part of the RC #3 claim.
2. Lead - anomalous values were found near the central portion of the RC #3 claim.
3. Zinc - anomalous values were found near the central portion of the RC #3 claim.

This survey was non-repetitive of any previously known work, and did benefit the exploration and development of each claim in said group.

The above work was supervised and performed by Anne E. Pate and Robert G. Pate, qualified experts in the field of mining and mineral exploration, with 7 years experience each.

Dated August 16, 1982
