REPORT OF MINERAL EXPLORATION ACTIVITIES
 CONDUCTED ON THE (See attachment) CLAIM(S)
 Eureka COUNTY, Nevada

The location of the work performed in relation to the point of discovery and boundaries of the claim(s): see attached map.

Nature or type of work performed: Geophysical Survey, Geological mapping, Geochemical sampling and Rotary Drilling.

Extent of work performed: 527 feet of rotary drilling, approximately 19 miles of geophysical survey, 328 geochemical samples collected and analyzed for 31 elements (290 samples) and 11 elements (38 samples) and geological mapping.

Cost of work performed: In excess of \$82,500.00

Basic findings of work performed: The McCullough Butte claim block does not show a significant geophysical anomaly but the St. Pat claim block does. St. Pat has numerous exposures of granite rock which intrude lower Paleozoic carbonates. The St. Pat geochemical samples produced values that were very low in most significant elements.

Person or persons conducting the work:
