

AFFIDAVIT OF ANNUAL ASSESSMENT WORK
GEOCHEMICAL, GEOPHYSICAL AND GEOLOGICAL SURVEYS
PURSUANT TO 1958 ACT

STATE OF NEVADA)
COUNTY OF EUREKA) ss.

Allen David V. Heyl, of lawful age, being duly sworn, deposes and says:

I. That he is acquainted with the following described contiguous unpatented lode mining claims situate, lying and being in the Antelope Mining District, Eureka County, Nevada, to wit:

Claim Name	Located in:			Recorded in:	
	Section	Tns.	Rge.	Book	Page
Dry #1-10	35,36	24N	50E	118	143-152

The deponent is Allen David V. Heyl, agent for Calli Exploration Associates (GEXA), and designated by the owners, GEXA,
(Name)

(Address)

to make the affidavit of annual representation of mining claims for and on behalf of the owners.

II. That the labor and improvements, as assessment work for the year ending September 1, 19 85, was completed at an actual cost of at least One Hundred Dollars (\$100.00) for each of the claims.

III. That the character and type of work done and improvements made included a detailed geochemical sampling program, covering lands contained in the forementioned claims plus adjacent lands. The sampling was done over sample traverses 100' by 200' Apart. (See Exhibit A, attached hereto and by this reference made a part hereof.) Geochemical analyses for Au, Ag, As, Sb, Cu, Pb, Zn, & Hg were made on approximately 120 samples by Atomic Absorption Assay. The purpose of this survey was to correlate existing mineral discoveries on each claim with anomalous areas determined by this program. The correlation is essential to the most efficient development of the mineral resources on these claims.

IV. That the labor was performed and the improvements made between August 9 and 14, 1985 days of work were done upon and for the benefit of the claims.

V. That GEXA expended more than \$1,000.00 dollars for the work and improvements.

VI. That the basic findings of this survey are as follows: The analytic results of the geochemical program, plotted on maps of appropriate scale and correlated with the bedrock geology, form anomalous patterns of sufficient magnitude, shape and areal extent to justify and encourage further and more extensive development work on each and all of the above-named claims. The individual analyses and the geochemical contour maps for each of the elements, Au, Ag, As, Sb, Cu, Pb, Zn, & Hg, produced from the analyses are on file in the offices of GEXA, 3746 Mill Street, Reno, Nevada 89502.

VII. That the work was performed by employees of GEXA, whose addresses and professional qualifications are as follows:

Allen David V. Heyl
P.O. Box 5071
Sparks, Nevada 89431
B.S. Geology

VIII. That said labor was done and said improvements made at the instance and request of the forementioned owners.

IX. That the work as herein described was done for the benefit of all the claims described in Paragraph I above at a total cost of more than \$1,000.00

John D. V. 211 Agent
