AFFIDAVIT OF ANNUAL ASSESSMENT WORK
NEVADA

STATE OF NEVADA)
) ss.
COUNTY OF WASHOE)

The undersigned, G. J. Molinari, certifies that at least ONE HUNDRED DOLLARS per claim was expended for development, labor and improvements, or equivalent value added, as the annual assessment work for the assessment year ending September 1, 1986 for the unpatented mining claims, as listed on the attached Exhibit A, generally located in Section 3, Township 28 North, Range 49 East, MDB&M, Eureka County, Nevada.

The work consisted of geological mapping and geochemical sampling (see attached report).

The work described above was performed at the following locations: All contiguous claims.

Said work was performed between July 11, 1986 and August 13, 1986. A total of more than \$2,400.00 was expended in performing the work, or equivalent value added. The work was performed by Homestake personnel.

All of the aforesaid unpatented mining claims are contiguous and work on, or for the benefit of, any one claim or group of claims tends to develop all the claims. The work was performed for the purpose of developing the mineral potential of the claims and to maintain and hold such claims for the owners/lessees of said claims, Homestake Mining Company.

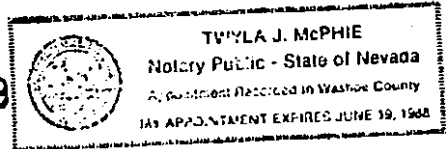

DATED this 5th day of September, 1986.

By G. J. Molinari

Subscribed and sworn to before me
this 5th day of September, 1986.

Thynla J. McPhie
Notary Public

COPY

Geological mapping and geochemical sampling were conducted on behalf of the claims listed in the preceding Affidavit, by Homestake Mining Company, during the period of July 11-14, 1986, August 12-13, 1986. This project consisted of eleven man days of geologic mapping, and the collection of 114 vegetation and 10 rock outcrop samples. Both the mapping and sampling programs were conducted by and under the supervision of G. J. Molinari, Geologist for Homestake Mining Company, with a BA from Chico State College, Chico, California.

The geology of the property is entirely intrusive related, with Cretaceous stocks and dikes of intermediate to felsic composition making up the majority of exposed rocks in the area. These units have been cut by a series of high angle basin and range type structures.

Geologic mapping was performed on all claims of the contiguous CF claim block. Samples were taken on claims CF 9-24.

Interpretation of the geology along with sample results have indicated several mineralized zones in the area that may have economic potential.
