Assessment work for 1987 consisted of earth disturbing work in the claim area consisting of drilling rotary drill holes and trenches. Access roads were built specifically for drilling. Drill holes were located to define ore reserves and to obtain bulk samples for further analysis. Drill sites and trenches are located within the mining block.

Said earth disturbing work was performed during the assessment year ending September 1, 1987, and serves to benefit each of the contiguous unpatented lode mining claims as listed on Exhibit "A" attached hereto.

DATED this 14th day of August, 1987.
