RECORDER'S STAMP

Note 1: This Affidavit or Statement of Annual Assessment work must be filed within 60 days after the performance of labor or making of improvements.

Note 2: "Each locator shall file two copies of a map prepared in accordance with NRS 517.030 with the county recorder in which the claim is located not later than September 1, 1972." NRS 517.230, Subsection 3.

CARLISLE FORM NO. 60 N

Report on Geochemical Survey for Claims  
Grimm 57 thru Grimm 110, Grimm 114 thru Grimm 142  
Grimm 163 thru Grimm 172, Grimm 185 thru Grimm 229

A geochemical survey of the above listed unpatented mining claims was conducted from June 1987 to August 1987. Soil samples were taken from the western portion of the claim group encompassing an area of 8000 feet by 1500 feet. Samples were taken on 100 foot intervals along east-west traverses 400 feet apart. All samples were assayed for lead and zinc by Chemex Labs Ltd. in Vancouver, B.C.

The results of this survey show small localized anomalous areas of Lead in:

- the western portion of Grimm 76
- the western portion of Grimm 130

The small localized anomalous areas of Zinc were in:

- the western portion of Grimm 76
- the western portion of Grimm 98
- the western portion of Grimm 129
- the western portion of Grimm 130

This survey was non-repetitive on any previously known work, and did benefit the exploration and development of each claim in this group.

The work was carried out by Anne E. Pate, a qualified expert in the field of mining and exploration for 11 years.

Dated August 31, 1987
