AFFIDAVIT OF ANNUAL ASSESSMENT WORK

State of Nevada }
 County of Washoe } SS:

THE UNDERSIGNED, Andy B. Wallace, does hereby swear and affirm, under the penalties of perjury, that the assertions of this Affidavit are true and correct, and that at least ONE HUNDRED AND 00/100 DOLLARS (\$100.00) per claim was expended for development, labor and improvements, or equivalent value added, as the annual assessment work for the assessment year ending September 1, 1987, for the following unpatented mining claims generally located in Section(s) 32, Township 33 North, Ranges 50 East, M.D.E. & N., Eureka County, Nevada.

NAME OF CLAIM(S)

BLM SERIAL NUMBER

BEO 77-112

NMC #: 308733-308768

OWNER OR CLAIMANT: Cordex Exploration Company
573 East Second Street
Reno, Nevada 89502

The work consisted of: VLF and magnetic geophysical surveys with three east-west lines and one north-south line having 50' data station spacings across claim block. The work described above was performed at the following locations: BEO 77, 78, 79, 83, 85, 86, 87, 88, 93, 94, 95, 96, 97, 98, 99, 101, 103, 104, 105, 106, 107, 109, 111, and 112. Said work was performed between July 13 and August 15, 1987. A total of more than Three thousand five hundred dollars (\$3,500.00) was expended value added. The work was performed by: Cordex Exploration Co. geologists Donald Avery, Valerie Bilbo, and Lindsay Craig.

All of the aforesaid unpatented mining claims are contiguous and work on, or for the benefit of, any one claim or group of claims tends to develop all the claims. The work was performed for the purpose of developing the mineral potential of the claims and to maintain and hold such claims.

DATED this 26th day of August, 1987.BY: Gswell

Subscribed and sworn to before me this 26th day of August, 1987.

1987 Assessment Work Report

BED 77-112 NMC # 308733-308768
Section 32, T. 33 N., R. 50 E.

On the BED 77-112 claim group separate VLF-EM and magnetic surveys were performed between 7/13/87 and 8/19/87 for assessment year 1987. Fifty foot centers were surveyed and flagged along four lines, three of which trend east and one trending south across the claim group. More than 21,000 linear feet of data was collected for each survey.

Both magnetic and VLF-EM variations were encountered in the surveys. Faults and lithologic variations within a Tertiary Rhyolitic dominant terrain accounts for these variations. Andesitic units and faults were mostly responsible for anomalies encountered in the surveys.

Surveys were supervised by Cordex manager, Andy B. Wallace, Ph.D. Ground work and data manipulation was performed by Don Avery, a Masters of Science Degree candidate, Valerie Bilbo and Lindsay Craig, both with Bachelors Degrees all of whom are geologists employed with Cordex. Wallace, Avery, Bilbo and Craig have sixteen, six, four and eight years experience, respectively, in mineral exploration and development in the western United States.

Instruments used were: Model EM 16 - a VLF-EM unit manufactured by Geonics Limited of Mississauga, Ontario, Canada. The magnetometer used was model G806 manufactured by Geometrics, Inc. of Sunnyvale, California.

Cost of the survey exceeded \$3,500.00. All data is available at the Cordex Exploration office, 573 E. Second Street, Reno, Nevada to qualified interested persons.
