AFFIDAVIT OF ANNUAL ASSESSMENT WORK
NEVADA

STATE OF NEVADA)

) ss.

COUNTY OF WASHOE)

The undersigned, Steven R. Davis, does hereby swear and affirm, under the penalties of perjury, that the assertions of this Affidavit are true and correct, and that at least ONE HUNDRED DOLLARS per claim was expended for development, labor and improvements, or equivalent value added, as the annual assessment work for the assessment year ending September 1, 1987 for the unpatented mining claims, as listed on the attached Exhibit A, generally located in Sections 2, 3, Township 18N, Range 52E; Sections 34, 35, Township 19N, Range 52E; MDB&M, Eureka County, Nevada.

The work consisted of reverse circulation rotary drilling and related mapping, sampling and geologic logging. Said work was performed between June 2, 1987 and August 31, 1987. A total of more than \$13,700.00 was expended in performing the work, or equivalent value added. The work was performed by Tonto Drilling Services, 2701 West 900 South, Salt Lake City, UT 84104, Hunter Mining Lab, Sparks, NV, and Homestake Mining Company personnel.

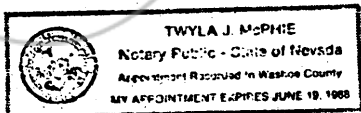

All of the aforesaid unpatented mining claims are contiguous and work on, or for the benefit of, any one claim or group of claims tends to develop all the claims. The work was performed for the purpose of developing the mineral potential of the claims and to maintain and hold such claims for the benefit of owner, Homestake Mining Company of California, and Mary & Geneve Bissoni.

DATED this 28th day of September, 1987.

By Steven R. Davis

Subscribed and sworn to before me

ADDENDUM

Geological mapping and geochemical sampling were conducted on, and for the benefit of, the claims listed in the preceding affidavit by Homestake Mining Company during the period of September, 1986 through June, 1987.

This project consisted of 12 man-days of geological and alteration mapping and the collection of 30 rock-chip samples and 83 soil geochemical samples. The rock-chip samples received sensitive geochemical analysis for gold, silver, arsenic, antimony and mercury. The soil samples were analyzed for mercury content by the conventional Hg sniffer technique and by the adsorbed-clay method developed by Exploration Technologies, Inc., of Houston, Texas.

The geological mapping and geochemical sampling were conducted by Steven R. Davis, Richard W. Bybee and Donald J. Baker, all full time employees of Homestake Mining Company and recognized professional geologists with 10 or more years experience in the minerals industry.

Geology in the area of the claim group consists of a rhyolitic Tertiary volcanic sequence cut by northerly faults and overprinted by a siliceous hot-springs assemblage with locally anomalous gold and silver and elevated levels of the associated trace elements: arsenic, antimony and mercury. The area geology displays characteristics commonly associated with "Hot Springs style" precious metal deposits and appears to merit additional exploration.
