SUMMARY REPORT

This detailed report is filed in compliance with the requirements of Title 30, U.S. code section 28-1 for the Cotton #1-22 contiguous lode mining claims, located in the Unknown Mining District, Eureka County, Nevada

The work consisted of:

Soil sampling on Cotton #1-22 between June 7, 1987 and June 10, 1987, and 196 samples analyzed thru ACME Labs.

This work was performed upon the Cotton #1-22 lode mining claims to evaluate the discovery of valuable mineral deposits located thereon and to assist in planning further development work. The basic finding of these surveys indicate that the mineralization present maybe within the Vinini Formation of Ordovician age similar to the Gold Bar deposit. This work was performed between June 6, 1986 and August 31, 1987 by or under the direct supervision of William Shalosky, a professional geologist employed by American Copper & Nickel Co., Inc. The cost of the above study exceeded \$4,800.00 and was paid for by American Copper & Nickel Co., Inc., operator for the owner Nerco Delamar, 111 SW Columbia, Suite 600, Portland, OR 97201, owner of the subject mining claims.

A continuing program consisting of drilling, sampling and further geological studies is planned on this property. All technical work and results are in the possession of American Copper & Nickel Co., Inc. a Minnesota Corporation, the operator of subject mining claims, for Nerco Delamar, 111 SW Columbia, Suite 600, Portland, OR 97201, owner of said claims.

Respectfully submitted,

Joy K. Moseley
