

AFFIDAVIT OF ANNUAL ASSESSMENT WORK

STATE OF COLORADO )  
                               )ss.  
 COUNTY OF JEFFERSON)

The undersigned, Robert M. Dahl, certifies that at least One Hundred Dollars (\$100) per claim was expended for development, labor and improvements as the annual assessment work for the assessment year ending September 1, 1987 for the following group of unpatented mining claims generally located in Sections 1-4, 10-15, 22-27, 35, 36, T.25N., R.48E., and Sections 12, 13, 24, T.25N., R.48.5E., MDBM, Eureka County, Nevada:

<u>Claim Name</u>	<u>Recorded at</u>	<u>BLM</u>
	<u>Book at Page</u>	<u>Serial Number</u>
Gap 1-417	141 71 - 487	NMC 355199-355615
Gap 418	141 488	NMC 355917

Such expenditure was made by Noranda Exploration, Inc., the owner of the claims.

The work consisted of biogeochemical sampling and geophysical surveys within the boundaries of the claim group. An audio magnetic telluric survey was conducted along 23,500 feet of surveyed traverse. A comprehensive electro-magnetic survey was conducted over the entire claim block. A grid system of 120,000 feet of survey line was established on the claim block. From this grid, 834 biogeochemical samples were collected for analysis.

Said work was performed between July 6, 1987 and August 11, 1987. A total of Forty Three Thousand Three Hundred Seventy Four Dollars (\$43,374) was expended in performing the work and was done by the following contractors who are qualified to perform such work:

Shea Clark Smith  
 Minerals Exploration Geochemistry  
 P. O. Box 18325  
 Reno, Nevada 89511

Richard Booth  
 Azimuth, Inc.  
 Yerington, Nevada 89447

High Country Geophysical, Inc.  
 P. O. Box 841  
 Bailey, Colorado 80421

G.S.I. Laboratories  
 2741 Toledo Street, Suite #211  
 Torrance, California 90503

The basic findings of the above work are as follows: The AMT and electromagentic surveys indicated the presence of conductors on the claim block. These, when correlated with anomalous patterns of metal concentrations resulting from the biogeochemical analyses and with the geology and rock types of the area indicate that future development of the claim group is encouraged. From this compilation of data, the selection of drill targets is being considered. The individual analyses and geophysical interpretations are on file in the offices of Noranda Exploration, Inc., Reno, Nevada.

All of the aforesaid unpatented mining claims form one contiguous group of claims and work on, or for the benefit of,

any one claim or group of claims tends to develop all the claims. The work was performed for the purpose of developing the mineral potential of the claims and to maintain and hold such claims.

This affidavit prepared in accordance with 30 USC Section 28 and Nevada Revised Statutes 517.230.

Dated this 16<sup>th</sup> day of October, 1987.

Robert M. Paul Agent for  
NORANDA EXPLORATION, INC.
