RECORDER'S STAMP

Note 1: This Affidavit or Statement of Annual Assessment work must be filed within 60 days after the performance of labor or making of improvements.

Note 2: "Each locator shall file two copies of a map prepared in accordance with NRS 517.030 with the county recorder in which the claim is located not later than September 1, 1972." NRS 517.230, Subsection 3.

Report on Geochemical Survey for Claims

RC 1, RC 2, RC 3, RC 4

A geochemical survey of the above listed unpatented mining claim was conducted in September of 1987. Rock chip samples were taken from the eastern half of RC 3 encompassing an area of 600 feet by 700 feet. Samples were taken on 100 foot intervals along north-south traverses 200 feet apart. Samples were assayed for silver and gold by Chemex Labs Ltd. in Vancouver, B.C.

The results of the survey show a small localized anomalous area of Gold in:

- the south central portion of RC 3

The small localized anomalous areas of Silver were in:

- the north central portion of RC 3
- the south central portion of RC 3

This survey was non-repetitive of any previously known work, and did benefit the exploration and development of each claim in this group.

The work was carried out by Anne E. Pate, a qualified expert in the field of mining and exploration for 11 years.

Dated October 22, 1987

Anne E. Pate
