**SUMMARY REPORT**

This detailed report is filed in compliance with the requirements of Title 30, United States Code, Section 28-1 for the JOE Nos. 457-476 and 507-526, a contiguous group of 40 lode mining claims situated in the Ivanhoe Mining District of Eureka County, Nevada.

The work consisted of geological mapping at a scale of 1" = 500' and geochemical soil sampling at corner and side center claim posts. The work was performed in order to evaluate the discovery of valuable mineral deposits located on the JOE claims above described, and to assist in planning further exploration and development work. All mapping and sampling was performed under the direct supervision of Judi C. Culver, Senior Geologist for Touchstone Resources, who is a Registered Professional Geologist, and who has over fifteen years' experience in the mining industry.

The basic findings of the study indicate that some geologic factors similar to other known mineralized properties in the region occur within the claim group boundary. Geochemical background and anomalous values have been contoured and are expected to yield one or more drill-hole targets. A program consisting of geophysical investigations and rotary drilling is under consideration for the property.

All technical work and results are in the possession of and are considered to be the exclusive property of the Hayes-TRC Joint Venture, with offices at 101-9 Carson Road, Battle Mountain, Nevada. Mailing address for the Hayes-TRC Joint Venture is P.O. Box 250, Battle Mountain, NV 89820. Phone (702) 635-9040.

Respectfully,

Judi C. Culver
