AFFIDAVIT OF LABOR

State of Nevada :
 :SS
County of Washoe:

Before me, a notary public, appeared the undersigned, who stated that between January 1 and August 30, 1988, he performed annual assessment work for the assessment year ending noon meridian September 1, 1988, on the claims shown in Exhibit "A", attached hereto and incorporated herein by reference.

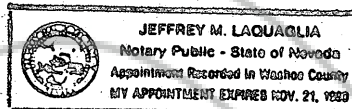

A description of the labor performed or improvements made is as follows:

A detailed geological and geochemical survey pursuant to 30 USC 28-1, shown as Exhibit "B", a copy of which is attached hereto and incorporated herein by reference.

The actual cost and value of the work done is in excess of one hundred dollars (\$100.00) per claim. The claims are contiguous and the work benefitted all the claims. The work was done at the expense of Cominco American Resources, Inc. under the direction of R.U. Suda, Project Geologist, by Wojtek A. Wodzicki, Geologist, for Beaver Creek Gold Mining Co., 14 Knollwood Rd., Eastchester, NY 10709, owner of said claims.

EXHIBIT
A

Those certain unpatented lode mining claims situated in Section 20,
Township 34 North, Range 50 East, MDB&M., County of Eureka, State of
Nevada, which claims are more particularly known as and named as
follows:

<u>Claim Name</u>	<u>Certificate Recorded Book/Page</u>	<u>BLM Serial Number</u>
SM1	94/193	192136
SM2	94/194	192137
SM3	94/195	192138
SM4	94/196	192139

EXHIBIT B

To Whom It May Concern:

This report is in compliance with the requirements of Title 30, United States Code, Section 28-1 for the SM1-SM27 Claim Group (See Exhibit "A") within Surveyed Sections 20, T34N, R50E, MDB&M., unknown mining district, Eureka County, Nevada.

Work done on the Property consisted primarily of detailed geologic mapping, and geochemical surveys over the entire claim group, to evaluate the presence of valuable mineral deposits located thereon and to facilitate planning further exploration and development work. This work was done between 1988 by Wojtek Wodzicki, Graduate Geologist and Robert Suda, Graduate Geologist in behalf of Beaver Creek Gold Mining Company. The above work exceeded \$100 per claim and was paid for by Cominco American Resources, 831 E. Glendale Avenue, Sparks, Nevada, 89431.

The above unpatented lode mining claims overlie a sequence of west dipping sequence of silts, shale, cherts with minor sandstone and sandstone of apparent Ordovician age. These rocks form subdued, rolling topography with small, scattered outcrops mainly along a north trending ridge. Much of the western and eastern portions of the property is covered by colluvium, which may conceal Paleozoic rocks. Local zones of chert breccia suggest north-trending structures, although these could not be traced over any distance.

Local zones of brecciation with weak silicification, bleaching, and minor quartz veining are found throughout the claims area. Results of over 35 rock chip and 28 soil samples indicate the presence of anomalous gold, silver, arsenic, antimony, and mercury throughout the property.

The results of this work suggest the presence of potentially economic levels of mineralization within the claim boundaries. Additional surface work, which will most certainly lead to drilling, is warranted. A program of detailed surface sampling and possible geophysics will aid a better understanding of the extent and nature of mineralization.

Robert U. Suda
Project Geologist
