AFFIDAVIT OF ASSESSMENT
BAR 628-661 CLAIMS
EUREKA COUNTY, NEVADA

LOCATION OF WORK: Work was performed on the BAR 628-661 claims and adjacent and contiguous fee land held by the Owners. See Exhibit C.

NATURE, EXTENT AND COST: A gravimetric survey was completed over the project area. A total of 34 stations were surveyed using a LaCoste and Romberg Model G gravimeter. Elevation control and station position were determined by a Total Station surveying transit.

The cost of the above surveys and interpretation was more than \$3,400.

BASIC FINDINGS The gravity survey delineated the presence of a north-trending fault which displaces potentially ore-related NNW-trending structures. These structures are relatively shallow in Section 6, where potentially ore-bearing Paleozoic sedimentary rocks are concealed by Carlin Formation. The results provide sufficient encouragement to continue development of all of the claims. The data are on file in the offices of Barrick Gold Exploration Inc.
