AFFIDAVIT OF ANNUAL ASSESSMENT WORK

STATE OF COLORADO )  
                          ) ss.  
COUNTY OF HESA )

TO WHOM IT MAY CONCERN:

THE UNDERSIGNED, W. L. Wilson, as a Partner of Windfall Venture, certifies that there was expended more than ONE HUNDRED DOLLARS (\$100.00) per claim for development, labor, and improvements as the annual assessment work for the assessment year ending September 1, 1989, for each and every one of the following 38 contiguous unpatented lode mining claims:

Owner: Windfall Venture  
P. O. Box 2183  
Grand Junction, CO 815502

The following claims located in the Eureka Mining District, Eureka County, Nevada, within Sections 23, 24, 25, and 26, Township 19 North, Range 53 East, MDB&M:

Claim Name	BLM Serial No.	Recordation Data

DETAILED REPORT OF GEOCHEMICAL SURVEY

This detailed report is filed in compliance with the requirements of 30 U.S.C. Sec. 28-1 and 43 C.F.R. Sec. 3851.2 for the mining claims listed on the attached Affidavit of Annual Assessment Work, comprising a contiguous group of 38 individual claims located in Sections 23, 24, 25, and 26 of T19N, R53E, MDB&M in the Eureka Mining District, County of Eureka, State of Nevada. This survey was performed as annual assessment work for the assessment work year ending at noon on September 1, 1989, for the benefit of all of the claims described on the attached Affidavit, by independent contractors employed by Windfall Venture, the owner of the said mining claims. These surveys are not repetitive of any previous survey, and such surveys have not been applied as annual labor on these claims for more than two consecutive years, or for more than a total of five years on any of the subject claims.

A geochemical sampling program was carried out on the subject claims between June 15, 1989, and August 20, 1989. Soil samples were taken at locations on the subject claims at 100' intervals along lines 200' apart, in the stipled area shown on Exhibit B, with a total of 155 samples collected. The samples collected were analyzed by GSI of Sparks, Nevada, for 15 different elements, including silver, gold, arsenic, bismuth, cadmium, magnesium, antimony, selenium, tellurium, copper, molybdenum, lead, zinc, gallium. The total cost for this geochemical survey was in excess of \$3,800.00.

BOOK 20 | PAGE 585

The basic findings of this geochemical survey are attached as Exhibit A. To summarize, there are anomalous amounts of gold, silver, and accessory minerals on the claims.

The qualifications of the personnel who performed the geochemical survey are as follows:

Brent Wilson            Consulting Geologist  
Education: B.S., Geology 1982  
Professional Experience: 7 years

The location of this work's performance with respect to the point of discovery and boundaries of each of the subject claims is shown on the Exhibit B map having a scale of 1" = 2000'.

The results of the geochemical sampling identified various mineral targets, both primary and secondary, which will be utilized to select other areas on the claims which geochemical sampling might benefit, and to select drill targets in subsequent years. Additionally, the geochemical sampling program will provide a data base for comparison with other areas on the subject claims which will be surveyed in future years.

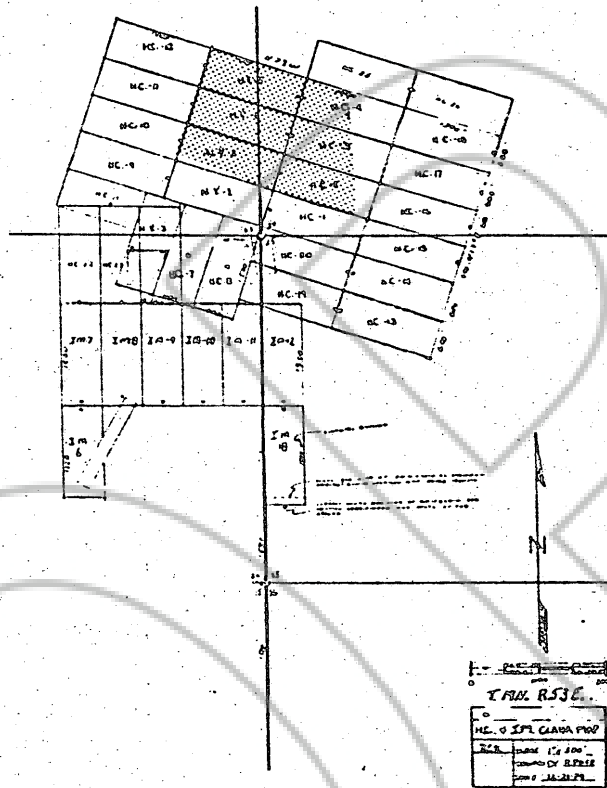

Respectfully submitted this 22<sup>ND</sup> day of August, 1989.
