AFFIDAVIT OF ANNUAL ASSESSMENT WORK
FOR
GROUP OF LODE MINING CLAIMS

STATE OF MONTANA)
ss.
County of Yellowstone)

The undersigned, Patrick C. Cavanaugh, certifies that at least \$62,300 (\$100 per claim) was expended for labor, improvements, and development, including drilling, and geochemical and geophysical surveys, as the annual assessment work for the 623 Nessa and KV lode mining claims listed in the attached Exhibit.

The claims are situated in Township 21 North, Ranges 49, 50, and 51 East, and Township 22 North, Range 50 East, M.D.M., Eureka County, Nevada.

The claimant is ECH, Inc., P.O. Box 3493, Billings, MT 59103.

Said work was performed by or at the expense of MolyCorp, Inc., P.O. Box 37, Louviers, Colorado 80131 for the claimant.

The work consisted of 1892 feet of rotary drilling located on claims KV 605, Nessa 57 and Nessa 67, at an expense of \$27,318, and geochemical and geophysical surveys over the claim block at an expense exceeding \$48,382.

A Summary Report, as required by Title 30, United States Code, Section 28-1, for geochemical and geophysical work performed, is attached to this Affidavit.

All of the lode mining claims listed in the attached Exhibit are contiguous, and all the aforesaid work was performed to benefit all the claims. The work was done for the purpose of developing the mineral potential of the claims and to maintain and hold such claims during the annual assessment year ending at noon, September 1, 1989.

SUMMARY REPORT
GEOCHEMICAL AND GEOPHYSICAL WORK

September 12, 1989

This detailed report is filed in compliance with the requirements of Title 30, United States Code, Section 28-1, for the Nessa and KV lode mining claims listed in the attached Exhibit, a contiguous group of 623 claims situated in Townships 21 North, Ranges 49, 50 and 51 East, and Township 22 North, Range 50 East, N.D.M., Eureka County, Nevada.

The work consisted of biogeochemistry and soil gas geochemistry surveys, and induced polarization and resistivity geophysical surveys conducted over the claim group for the purpose of developing the mineral potential of the claims. The work was performed between September 12, 1988 and February 15, 1989, by or under the direct supervision of Ray W. Hammitt, MolyCorp, Inc., P.O. Box 37, Louviers, Colorado 80131, a geologist with 15 years of experience in minerals exploration with a Master of Science Degree in Geology from the University of Oregon in 1972. The cost of the geochemical and geophysical surveys exceeded \$48,382, and was paid for by MolyCorp, Inc., former lessees of the subject mining claims.

The biogeochemistry survey was conducted over the entire claim group. Results of the survey indicated that mineralization may occur at depth on the claim group.

The soil gas geochemistry survey was conducted over the northeast and northwest corners of the claim group. Results of the survey indicate several mineralized structures may project onto the claim group from the north and may be present at depth on the claim group.

The induced polarization and resistivity geophysical surveys were conducted over the northeast and northwest corners of the claim group. Results of these survey indicated that a mineralized system with low sulfide content may be present on the claim group.

All results of these geological and geochemical surveys are in the possession of ECM, Inc., P.O. Box 3493, Billings, Montana 59103, the owner of the subject mining claims.
