RECORDER'S STAMP

1990 Summary Report
WH Claim Group
Section 14, T27N, R49E

This report is filed in compliance with the requirement of 43 CFR 3851.2 for the contiguous WH claim group named and described on the attached Affidavit of Annual Assessment Work.

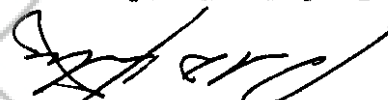

All claims are situated in an unnamed mining district of Lander County, Nevada. All corners, side centers, and location monuments have been established and are in the proper place and position. The work was supervised and directed by Paul D. Hartley, Exploration Manager for Nerco Exploration Company. Mr. Hartley is an economic geologist with over 17 years of mineral exploration and mine development experience. He has a BS degree in Geology and an MS degree in Applied Earth Science from Stanford University.

Assessment work included rock chip sampling and multi-element analysis of samples. The analyses were conducted by American Assay Lab of Sparks, Nevada and total costs exceeded \$700.00.

Results from the sampling work indicate that geologic conditions that are favorable to the development of mineral deposits, are present within the claim group.

This summary report represents a portion of the entire work done and is not intended to represent a complete account of all work done. All technical results are in the possession of and considered to be the exclusive property of Nerco Exploration Company.

Respectfully submitted,

Paul D. Hartley

Exploration Manager
Nerco Exploration Company
