#### 1992 AFFIDAVIT OF ANNUAL ASSESSMENT WORK

| STATE OF NEVADA  | ) |   |
|------------------|---|---|
|                  | ) | S |
| COUNTY OF EUREKA | ) |   |

- D. R. Anderson, being first duly sworn, states and says:
- 1. That in making this Affidavit he is acting for and on behalf of PATHFINDER EXPLORATION CORPORATION, a Nevada corporation.
- 2. That this Affidavit is made for the purpose of showing and making of record the performance of annual assessment or representative work as required by law between noon on the 1st day of September, 1991 and noon on the 1st day of September, 1992 on unpatented lode mining claims located and situated in Township 19 North, Range 53 East, Sections 23, 24, 25, 26, and 35, Eureka County, Nevada and recorded in the records of Eureka County as described in Exhibit A, attached hereto and by this reference made a part hereof.
- 3. That said claims are owned by Windfall Venture, P.O. Box 2183, Grand Junction, Colorado and leased by Pathfinder Exploration Corporation, and that said claims are contiguous and have been consolidated into one group for the purpose of common development.
- 4. That the work consisted of rock chip sampling, BLEG stream sediment geochemistry, and geologic type work. For compliance with the requirements of Title 30 United States Code 28-1 relating to geological type work, a summary report is attached hereto as Exhibit B, and incorporated herein by this reference.

The work performed during July and August 1992 consisted of detailed geological and geochemical surveys performed by Robert P. Cline, and Michael Turner; consulting geologist and staff geologist for Pathfinder Exploration Corporation. The personnel are geologists holding degrees in geology from accredited universities; each with in excess of 10 years experience in the Mining Industry. The cost of the studies, exceeds \$5,200.

All technical work and results are in the possession of and are considered to be the exclusive property of Pathfinder Exploration.

#### EXHIBIT "B"

# SUMMARY REPORT NEW YORK CANYON PROJECT, EUREKA CO., NEVADA

Exploration activities were conducted within the New York Canyon Project claim block defined in the attached exhibit "A", a contiguous block of lode mining claims. The work was conducted during the months of July & August 1992 and consisted of geologic field work, rock chip sampling, and BLEG analysis of stream sediment samples.

The surveys were conducted by Robert P. Cline, and Michael J. Turner; consulting geologist and staff geologist for Pathfinder Exploration Corporation. Analytic work was completed by Bondar Clegg Laboratories Inc. of Reno. The personnel employed by Pathfinder Exploration Inc are all geologists holding degrees in geology from accredited Universities; each individual with in excess of ten years professional experience.

The field investigations identified extensive zones of silicification and decalcification associated with north striking faults. Sampling within these areas has defined several zones with anomalous concentrations of Au, Ag, & As. These occurrences and the concentrations found are similar in magnitude to those associated with the nearby Ruby Hill, Windfall, and Lookout Mtn Mines.

These studies furthered our knowledge of the controls and styles of alteration possibly related to economic mineralization within the project area, thereby helping to direct ongoing exploration and development of the mineral potential.

Michael J. Turner Senior Geologist

Pathfinder Exploration Inc.
