OVERVIEW SCALE 1"=2000'

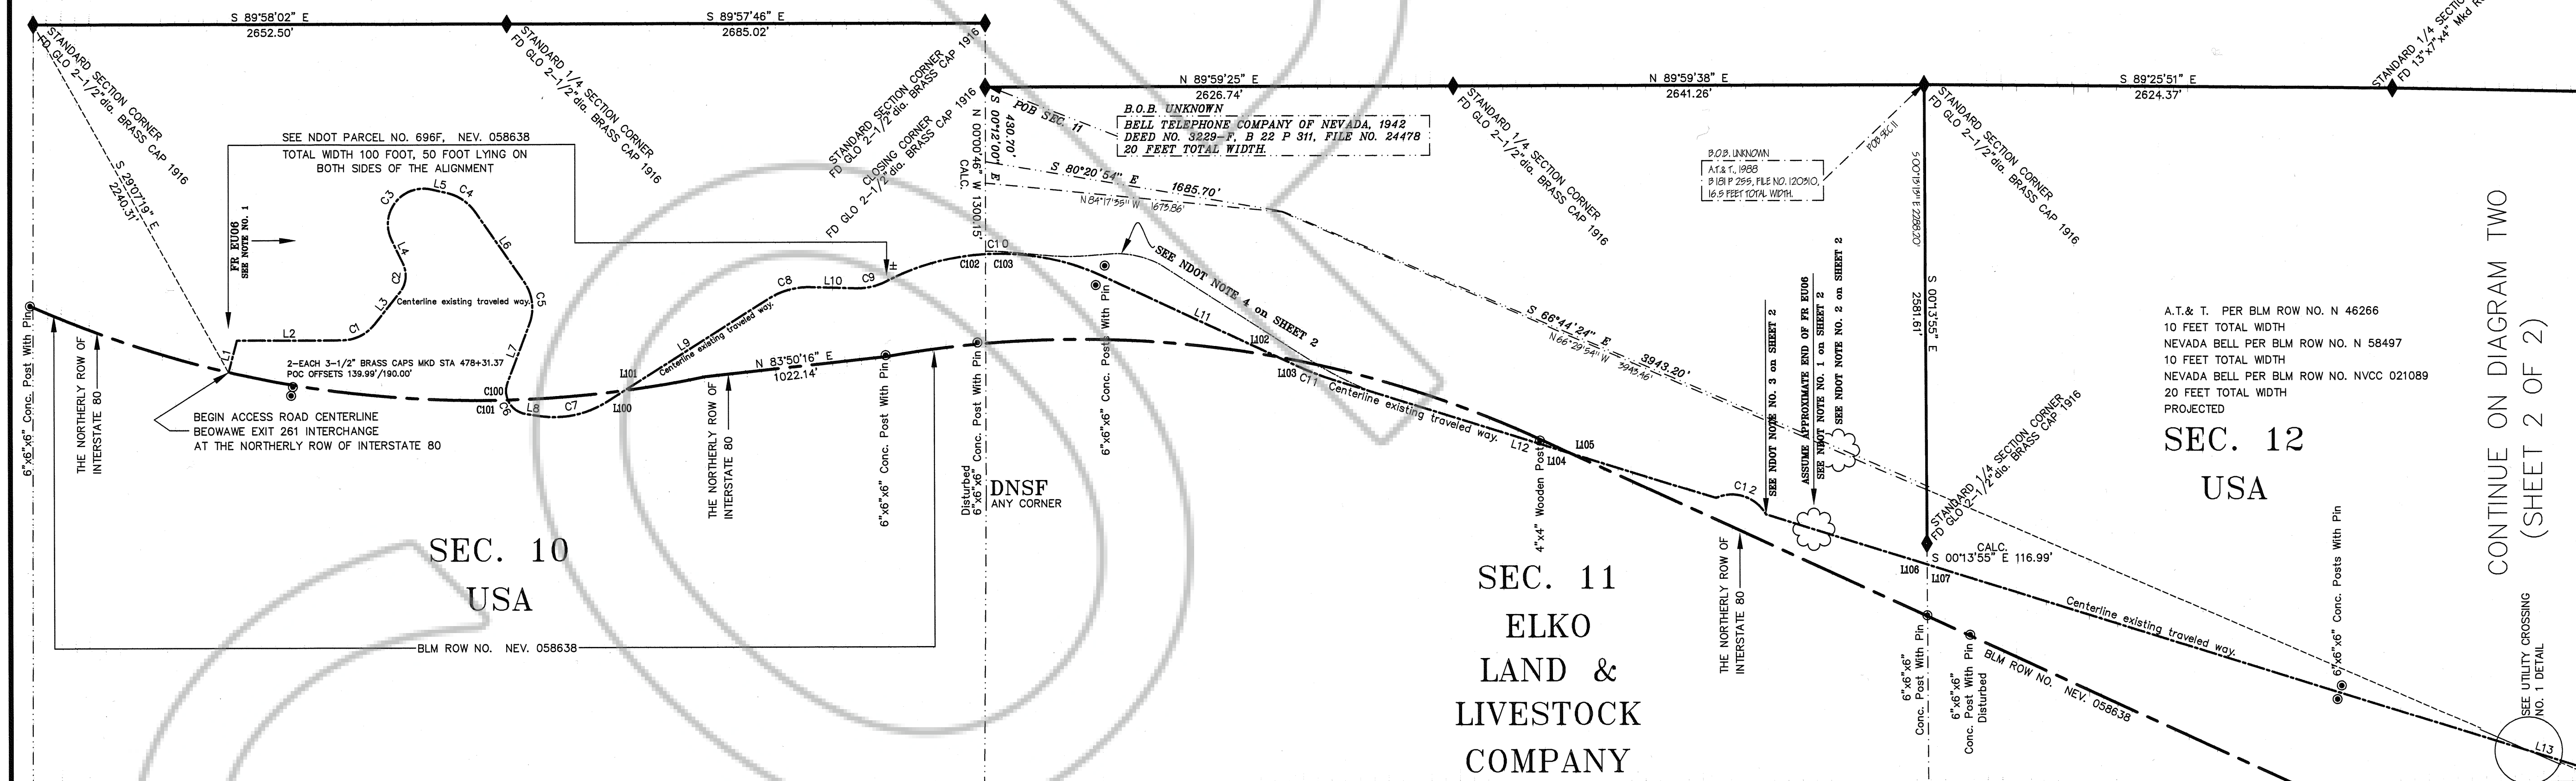

SURVEY, EQUIPMENT, and ACCURACY
 This survey was conducted using up to four Trimble Navigation Model 4700 Global Positioning System (GPS) receivers and was configured to a real time kinematic surveying system using one receiver as a base to transmit differential GPS data to the other roving receivers equipped to receive the GPS differential information from the base station and compute real time coordinates for each point. This surveying system was used to determine the direction and distance of all lines of this survey. The accuracy of this survey method is stated to be 2 centimeters + 2 parts per million (0.07 ft. + 2 parts per million) uncertainty of position for each point within the survey. The survey system was tested for accuracy of position on two control points of known position at the beginning and end of each surveying session and found to be in correct operation during each session.

BASIS OF BEARINGS
 The Basis of Bearing is from the NGS Station DUNPHY to the NGS Station TWIN having a geodetic bearing and ground distance of S 68°19'41" E, 32193.87'.

SURVEYOR'S CERTIFICATE

I William F. Mueller, a Professional Land Surveyor licensed in the State of Nevada, certify that:

- This plat represents the results of a survey conducted under my supervision at the instance of WVC LICENSE LLC.
- The land surveyed lies within T. 32 N., R. 49 E., and T. 32 N., R. 50 E., MDM, Eureka Co., Nevada and the survey was completed on December 15, 2000.
- This plat complies with applicable statutes of this state and any local ordinances in effect on the date that the survey was completed, and the survey was conducted in accordance with Chapter 625 of the Nevada Administrative Code.
- The monuments depicted on the plat are of the character shown, occupy the positions indicated, and are of sufficient durability.

PURPOSE OF SURVEY

The purpose of this Record of Survey is to make a survey record of the access road alignment for WVC LICENSE LLC from the northerly right of way of Interstate 80 at the Beowawe interchange, Exit 261, situated in Section 10, T. 32 N., R. 49 E., MDM, to the cell phone site situated in Section 16, T. 32 N., R. 50 E., MDM. The majority of this route is along existing graveled roads. Most of these roads were established by NDOT or Southwest Gas Corporation. No documentation of these alignments were recorded in Eureka County. This map provides the necessary information for the preparation of land descriptions for that portion of the access road that crosses Elko Land and Livestock Company ownership and Public Land administered by the BLM.
